GENERAL STATEMENT

SECTION I

GENERAL STATEMENT

Description of Property Affected.

The property that will be affected by the execution of the Plan of the Middle Rio Grande Conservancy District is all situated in the State of New Mexico, in Rio Arriba, Sandoval, Bernalillo, Valencia and Socorro Counties. It is of two general classes - that which will be damaged or taken, and that which will be benefited. Nearly all of this property lies within the boundaries of the District, but small portions are outside of those limits and are classified separately.

Accordingly, all property affected by the Plan is described under the main headings in Sections III and IV hereof, as follows:

Section III - Property to be Damaged or Taken.

A - Within the District

B - Outside the District

Section IV - Property to be Benefited.

C - Within the District

D - Outside the District

Property affected by the Plan consists of all lands listed and described in Part IV, and the following statement; "including all public and private property, rights, easements, equities, franchises and public utility holdings thereon or therein", is hereby made a part of every property description in said Part IV.

Descriptions of this property are based upon the Division Maps

and Property Maps and upon the projected locations thereon of the proposed canals, drains and other works contemplated by the Plan. The Division Maps and Property Maps are filed as Exhibits M-1 and M-2, respectively, accompanying the Plan, and are hereby, without need of further reference, made a part of the descriptions hereinafter set forth.

In the descriptions of the District boundaries and of the portions of the District in the several counties, the terms "Township", "Range", and "Sections", and the naming of subdivisions of sections, refer to such land-units as defined and determined by the Public Survey system. All Townships and Ranges are N, S, E, or W, as the case may be, from the New Mexico Principal Base and Meridian. In portions of the District where the public-survey lines have been officially established by the United States General Land Office or by the United States Indian Service, said terms refer to such land-lines or land-units as they are actually marked upon the ground. In portions of the District where such lines have not been so officially established, said terms refer to them as they would be marked upon the ground by continuation or projection of the public-survey lines over those areas in conformity to the rules and regulations of the United States General Land Office. In naming subdivisions of Sections, lot numbers are not used on account of confusion or errors that might arise, due to occasional irregularities in such lot-numbering in the public surveys, and due to the fact that such lot-numbering is difficult of determination in areas not yet covered by official public surveys.

In right-of-way descriptions, references are made only to such

Section, Township or Range lines as have been officially established by the United States General Land Office or by the United States Indian Service.

Where bearings are used, they are referred to true North. Where bearings or distances are approximate, that fact is indicated by an asterisk (*) immediately following such bearing or distance.

All right-of-way descriptions, being based upon proposed and projected locations, are subject to such additions thereto and changes therein as shall be found necessary or desirable in the execution of the Plan, including required curves at angle-points.

Definitions.

Office Memorandum • UNITED STATES GOVERNMENT

TO : Mr. John C. Thompson, Project Manager
Attention: Mr. Herman Carter

DATE: November 15, 1956

FROM : Thomas O. Olson, Attorney-Adviser, Office of the Field Solicitor

SUBJECT: Right-of-Way - Los Chavez Acequia

Admin. H. H. H.
Office Eng. H. H. H.
Contract Admin. H. H. H.

Reference is made to your memorandum of October 31, 1956 and our several discussions relating to the subject matter. You will recall that this pertains to the dispute raised by the Hathaways relative to whether there is an existing 50 foot right-of-way for the Los Chavez Acequia.

I note that your memorandum states that the official plan, particularly Volume 3, does not describe the Los Chavez Acequia. In leafing through the portion of Volume 3 relating to the Belen Division, I note that page 192 of the copy which you provided us with last spring describes a Los Chavez Lateral. I do not know whether this concerns the particular ditch with which we are presently concerned.

In addition to this, I have reread the case entitled Middle Rio Grande Conservancy District v. Chavez, 101 Pac. 2d 190 (MN 1940). On page 193, the court makes the following statement:

The report of the appraisers adopted by the court upon the approval of the official plan shows that the Los Chavez Ditch was appraised, compensated for and taken over by the District.

The court further states on page 193:

It is conceded that neither defendants [the Ditch Commissioners and Mayor Domo] nor any property owners under the said Los Chavez Ditch made and sustained legal objections to plaintiffs' method and manner of taking their appraisal, prior to the decree approving the official plan of the district and the appraisal report.

Because of the above statements, it appears that the Los Chavez Ditch should be included in the appraisal report even though it perhaps is not in the official plan. Therefore, may I again suggest that you carefully examine the appraisal report to determine the reference made to the Los

Chavez Ditch and, of course, particularly as to whether any described width of the right-of-way is ~~satisfactorily~~ found therein.

As I expressed yesterday, this appears to be the only hope for sustaining the view that there is a 50 foot right-of-way over the Hathaway land.
