

The Middle Rio Grande Conservancy District (MRGCD) is currently in the process of reviewing the existing Rule No 28 Gate Request Policy (Policy). The purpose of this review is to provide recommendations and updates to the Policy to better reflect the MRGCD's responsibilities and public interest. These include delivery of irrigation water, providing for public safety and conservation, while continuing to allow low impact recreation along MRGCD rights-of-ways except on tribal land. Following the completion of this review a draft copy of the updated Policy will be provided to the public for review and comment prior to any board action.
