Water Distribution Department

Irrigator Survey

MRGCD Irrigators, thank you for your cooperation during a challenging 2021 season. Monsoonal rains and enhanced water distribution efficiency allowed irrigation deliveries much longer than pre-season predictions. However, given the difficult water supply conditions and the need to minimize Rio Grande Compact debit, the irrigation season still ended early. The MRGCD is committed to improve communication and offer new services as we work through challenges and tough conditions. **The information collected here will assist the MRGCD in providing efficient services in this next irrigation season.**
